About Me

I am an Informatics Engineering student at Politeknik Negeri Semarang passionate in Backend Development with hands-on experience in building academic or self-projects. As for the projects I have worked on, along with my experience in deployment automation and documentation. I 'm able to work collaboratively in a team, while delivering secure, efficient, and scalable backend solutions.

Education

State Polytechnic of Semarang - Semarang, Indonesia

Sept 2023 - Present

Diploma in Computer Engineering, 3.80/4.00

Work Experience

PT. Sebangku Jaya Abadi

August – December 2025

Android App Developer Intern

- Developing and deploy a **Flutter**-based app educational application focused on developing payment gateway (**Midtrans**) function and gamification features.
- Platform escalation with creation of a **Kemenag DIY** application intended for prematerial education in Yogyakarta.
- Designing the creation of white label app by applying the **Open API** endpoint.

PT. Data Utama Dinamika

March – May 2022

Technical Support Intern

- Diagnosed and resolved client-side network issues to maintain stable connectivity and system performance.
- Collaborated with senior technical support engineers in conducting site surveys and supporting the deployment of wireless network infrastructure.

Projects Experience

PromptSaver – AI Chat (in progress)

February - Now

Technologies: **React**

- Designing prompt management saver with **AI Chat** integration using free model **Open Router**
- Using PostgreSQL for the database and JWT Auth for authentication

Fitacademy – Micro Learning App

August – December 2025

Technologies: **Dart | Flutter | Laravel**

- Developed and deployed **Flutter**-based app that **enhance learning** methods and user experience in the convenience of a flexible learning system
- Releasing new features that have never been seen before, such as gamification functions and additional developments for payment gateways that better reach Fitacademy's main features both in **Laravel** and **Flutter**.

Finari – Personal investment

June 2025

Technologies: **Flutter | Laravel**

- Integration backend API for managing portofolio and user data management.

Online Exam Monitoring System

March – May 2025

Technologies: **React | Laravel**

- Developed scheduling dashboard management, and integration using RESTful API

Flexy – A Ticket and Goods Management App for Businesses

May – December 2024

Technologies: **Dart | Flutter | Laravel:**

- Developed key application features including user authentication, personalized user dashboard, product listing, and checkout functionalities for both ticketing and product purchases.
- Integrated a Laravel-based back-end system with **RESTful API** implementation to ensure secure, scalable, and responsive data communication between client and server.
- Build **CI/CD** automation for deployment and secure checking.

Technical Skills

Languages: Dart, PHP, MySQL, PostgreSQL, HTML5, CSS, Javascript

Developer Tools: Postman, Git, Docker, Firebase, Supabase, Jira, Linux

Libraries / Frameworks: Flutter, Laravel, React
